NSF Current and Pending Support (required for NSF submission)

This section of the proposal calls for required information on all current and pending support for ongoing projects and proposals, including subsequent funding in the case of continuing grants.

All current project support from whatever source (e.g., Federal, State, local or foreign government agencies, public or private foundations, industrial or other commercial organizations) must be listed. Internal funding from Columbia University does not need to be included.

The proposed project and all other projects or activities requiring a portion of time of the PI and other senior personnel must be included, even if they receive no salary support from the project(s) (i.e. you must include all current and pending grants that you are listed on even if little time is devoted to the project).

The total award amount for the entire award period covered (including indirect costs) must be shown as well as the number of person-months per year to be devoted to the project, regardless of source of support. Similar information must be provided for all proposals already submitted or submitted concurrently to other possible sponsors, including NSF. Concurrent submission of a proposal to other organizations will not prejudice its review by NSF.

Specifically, in order to fill out the page in Fastlane, you will need to provide the following information about ALL (federal and nonfederal) of your current and pending grants (even if you receive no salary support from the project):

1. Is it Current? Pending? or Planned for the near future?
2. Title of Project
3. Source of Support (e.g. National Science Foundation, Carnegie Corporation of New York)
4. Total Award Amount (including Indirect Costs)
5. Award Period Covered (mm/dd/yyyy to mm/dd/yyyy format)
6. Location of Project (e.g. Columbia University)
7. Person MONTHS (not percentages) per year committed to the project (please do not list 0 months). Are these months: A) Calendar B) Summer C) Academic?

Each PI and other key personnel—(those required to submit a biosketch)—should email ISERP’s Grants Manager, Tiffany Kim (tk2069@columbia.edu) with this information as soon as possible for the NSF Fastlane submission.
